

## D 8.1 Website Framework

Our web presence includes our **public website** (D8.2), plus our **private wiki** for team members. We also have a **web forum** (D8.4)

### Website

The website is structured like this:

The website is at [www.euro-cares.eu](http://www.euro-cares.eu).

### Wiki

At this webpage there is also a link to the private wiki for members, which requires a log in and password to access. Here we put our draft deliverables for comment from others, relevant literature, presentations, meeting minutes, workshop plans etc.

### Web Forum

The web forum is at <http://www.euro-cares.eu/forum/>

Here are some screen images from our website:

EURO-CARES (European Curation of Astromaterials Returned from Exploration of Space) is a three year, multinational project, funded under the European Commission's Horizon2020 research programme. Our multidisciplinary team of experts from academia and industry are developing a roadmap for a European Sample Curation Facility (ESCF), designed to curate precious samples returned from Solar System exploration missions to asteroids, Mars, the Moon, and comets.

Interested to learn more about the project? [Click here](#) or download a summary of the project [here](#).

WP3 WP3 Intern WP3

We have designed the website to be multi-layered and to have information for different stakeholders, such as colleagues at ESA and other space agencies, the public, media, researchers and curators. There is a simple introduction to the project, and more detailed information including project plan and deliverables can be obtained by clicking on links. We know that the website has already been used by our colleagues and peers, by participants in related EC H2020 funded projects, by participants in our meetings and by the public. Their feedback has improved the site.

Our meetings page contains information that would be useful for potential participants, such as dates, registration information, topics, logistical information *etc*:

- [Home](#)
- [Programme](#)
- [Topics and Invited Speakers](#)
- [Registration and Abstract Submission](#)
- [Venue](#)
- [Travel Information](#)
- [Accommodation](#)

The organizers gratefully acknowledge the generous support of:

### Horizon 2020 EURO-CARES WP3 Meeting

Designing a European extraterrestrial sample curation facility

The website has the following credit to our source of funding:

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 640190.
